

BULLET LEAD CORE BONDING

Bonding involves soldering together the bullet jacket and core to produce a uniform structure preventing separation or fragmentation on impact. Now there is a compact and completely automatic, PLC controlled system from NORAX INDUCTION.

- **ACCURATE**
- **CONCENTRIC**
- **ECONOMICAL**
- **100% BONDED**
- **100% GUARANTEED**

TECHNICAL SPECIFICATIONS

- 60-70 PPM Production Rate
- 30 kW Induction Power Supply
- PLC Controlled / Touch Screen
- Closed Loop Water System
- Dimensions : 60" x 40" x 75"
- Jacket / Flux / Core Integration
- Adjustable Flux Quantity
- Auto Parts Detection
- Automatic Rejection of Failed Parts
